# Roofing & Wall Cladding

Hiland Tray™

Stratco's Hiland Tray epitomises the classic standing seam look architects and homeowners desire for roofing, wall cladding, and sheds.

Stratco's Hiland Tray range features three different profiles that achieve a Standing Seam type appearance.

All three profiles offer variable widths, two separate rib heights, multiple colours, different finishes, and various fixing methodologies.

Depending on personal preference you may choose the ease of installing Nailstrip, utilise the concealed clip of Snaplock, or prefer the detailing of the visually stunning Standing Seam.

Colours offered by Stratco ranges from standard Colorbond® to Matt Finish, Metallic, Woodgrains, or something bespoke from Colorbond® Studio that truly makes your project one of a kind.

As trends move back to a raw and uncomplicated appearance Stratco offer the choice of Zinalume®, Galvanised Z600, Corten, and Copper.

Regardless of your project requirements Stratco can provide a solution.
