Architectural Wall Cladding

NINELINE™ Flute

STRATCO

NINELINE™ Flute

Inspired by the shape of a traditional half-round gutter, Flute gives architects and designers a new curved wall cladding option.

This simple shape has been reinterpreted to create a façade that offers a shadow effect that currently doesn't exist in steel wall claddings. An Australian built environment first, this profile features a 144mm rib height. There are no exposed fixings; this installation method cleverly ensures a fully waterproof wall system.

The modular panels are demountable offering high impact resistance and easy panel replacement. Flute can be planned around openings and standard building dimensions; detailing recommendations are available to assist with parapets and corners, etc.

Perfect for commercial and residential application, Flute is complemented by an extensive range of colours and finishes to suit your vision, including a Stratco exclusive range.

Ask to see NINELINE™ Flute for yourself. Available exclusively from Stratco Australia.

Features at a glance:

Rib Height:	144mm
Cover:	300mm
BMT:	0.55
Fixing Method:	Concealed Clip
